# Disable the Internet Explorer security warning

If you are using Internet Explorer, you might be experiencing the following security warning when you access a page in your website administration area.

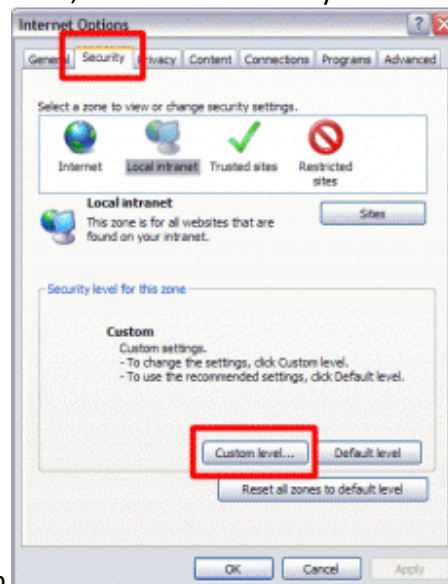

To prevent this message from occurring, you will need to adjust your Internet Options in Internet Explorer.
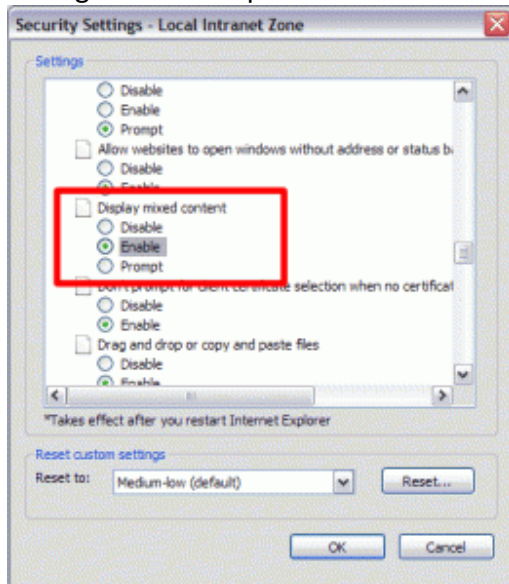

1. In Internet Explorer, click on Tools

2. In the drop down, choose Internet Options
3. In the Internet Options pop-up window, choose the Security Tab.

4. Click on the Custom level… button

5. Scroll down (about 1/2 way) and find the option "Display mixed content". Change this setting from "Prompt" to "Enable".

6. Click Okay. You will receive a message that asks if you are sure you want to change the settings for this zone. Say yes.
7. Click Okay again to close the Internet Settings box.
